PhD	Job Placement Rate	N/A	The objective of this Program is research rather than job placement.

Calculation for Measures

The job placement rate is a metric that we have used to evaluate the effectiveness of our Institute of Business Management in helping our students secure employment after completing their studies. This has been calculated using the following formula:

MEASURE	DESCRIPTION AND HOW IT WAS CALCULATED
Job Placement Rate	Total Students Placed */ Total Number of Students**

*Total Students Placed, refers to the number of students who have successfully obtained full-time jobs related to their field of study after completing their educational program.

**Total Number of Students, refers to the total number of students completed the educational program during the specified period and do not include those who enrolled but did not complete it.

Note:
- All the Jobs are Full Time.
- Students are placed in their field of study only.
- The placed students obtained their job offers within three months' post completing their educational program.
