Workshop-Cum-Orientation for Law Students

HEAD OF THE DEPARTMENT
Dr. Rajesh Kumar

Librarianship is certainly a noble profession that requires specialized knowledge and skills. It requires intrinsically interdisciplinary alignment with the core value of the organisational work field, and demands additional skills in computer application, social communications, psychology, digital advancements, business and management laws, etc. Thus, librarianship is an excellent profession for those who enter into it with a seriousness of purpose. Therefore, The prime objective of the programmes is to develop high-quality minds in the domain and I am excited to welcome such devoted and dedicated aspirants. We educate and train the students to meet the challenges of fast-changing world of ICT such as the foundation principles of information science, design, plan, and implement the policies related to information resource procurement, collection management, and customisation of information services. I look forward to engaging with the future Information Administrators and Scientists.
